

LUCAS PAINELI GIMENES

Software Developer | C# · .NET · Oracle Database · SQL/PL/SQL

Sorocaba, Brazil

painelilucas@gmail.com | linkedin.com/in/lucaspaineli | github.com/paineli

SUMMARY

Software Developer with **6 years in technology** and 2+ years building and maintaining production systems in enterprise environments. Strong dual background in **back-end development (C#, ASP.NET Core, .NET Framework)** and **data engineering (Oracle Database, SQL, PL/SQL)**, comfortable owning both the application layer and the data layer of complex systems. Experienced integrating heterogeneous systems via **RESTful APIs, HL7, and DICOM** in high-availability, regulated contexts where data integrity and uptime are critical. Actively incorporates **AI-assisted development workflows** (GitHub Copilot, Claude, Cursor) to accelerate delivery and improve code quality. Solid foundation in **Software Architecture** (Clean Architecture, SOLID, Design Patterns), Postgraduate Specialization completed with GPA 9.6/10. Completed an **Executive MBA at FGV**, adding business and systems thinking to a technical profile. Professional English proficiency.

TECHNICAL SKILLS

Languages: C#, SQL, PL/SQL, JavaScript, HTML5, CSS3

Frameworks & Platforms: ASP.NET Core, .NET Framework, .NET Core, ASP.NET MVC, Entity Framework, Razor, Bootstrap

Databases & Data: Oracle Database, SQL Server, Azure SQL (stored procedures, triggers, query optimization, performance tuning, data modeling)

APIs & Integration: RESTful API design and consumption, REST, HTTP, JSON, HL7, DICOM, inter-system integration

Architecture & Practices: Clean Architecture, OOP, SOLID, Design Patterns, Clean Code, Code Review, Agile/Scrum

Tools & DevOps: Azure DevOps, Git, TFS, Visual Studio, Linux & Windows Server administration

AI-Assisted Development: GitHub Copilot, Claude (Anthropic), Cursor (applied daily for code generation, review, refactoring, and documentation)

WORK EXPERIENCE

Unimed Sorocaba

Oct 2024 – Present

Web Developer Analyst Jr | C# · ASP.NET Core · Oracle Database · REST APIs

- Develop and maintain enterprise healthcare web systems using **C# with ASP.NET Core and .NET Framework**; build and expose REST APIs consumed by clinical and operational workflows
- Own the data layer: design, write, and optimize **Oracle Database** queries, stored procedures, triggers, and PL/SQL functions for healthcare data processing at scale
- Lead inter-system integration between **PACS, RIS, and HIS** platforms via RESTful APIs, ensuring data consistency and reliability across the clinical environment
- Apply **Clean Architecture, SOLID principles, and Design Patterns** in new features; conduct

code reviews and drive quality standards within the team

- Use **AI-assisted development tools** (GitHub Copilot, Claude, Cursor) as part of the daily development workflow to accelerate delivery and refactoring cycles
- Manage versioning and CI collaboration via **Azure DevOps (Git/TFS)**; maintain and evolve legacy .NET systems alongside new feature delivery
- Deliver full-stack when required: front-end interfaces with HTML5, CSS3, JavaScript, Bootstrap, and Razor

Unimed Sorocaba

Feb 2023 – Sep 2024

PACS Systems Analyst | Oracle DBA · SQL/PL/SQL · HL7 · DICOM · Linux/Windows

- Managed end-to-end **PACS/RIS/HIS environment** in a mission-critical healthcare setting: installation, configuration, maintenance, and upgrades
- Acted as **Oracle DBA**: developed SQL and PL/SQL scripts for process automation, data extraction pipelines, and performance tuning across medical imaging databases
- Integrated clinical systems using **DICOM and HL7** protocols; served as N3 escalation point for complex integration and data pipeline failures
- Administered **Linux and Windows servers** in high-availability setups; designed and tested disaster recovery procedures
- Coordinated with vendors and internal teams on system upgrades, patches, and capacity planning

Unimed Sorocaba

Jun 2021 – Jan 2023

PACS Technical Support Assistant | Healthcare IT · Systems Support

- N2/N3 technical support for **300+ healthcare professionals**, resolving incidents related to medical image viewing, storage, and transmission
- Configured and maintained PACS workstations and imaging modalities (CT, MRI, X-Ray); Linux/Windows server administration in high-availability environments
- Diagnosed and resolved integration and connectivity issues between imaging modalities and PACS servers

Instituto de Diagnósticos de Sorocaba (IDS)

Oct 2020 – Jun 2021

IT Intern | Technical Support & IT Operations

- N1/N2 technical support; installation and maintenance of internal systems; Windows Server and Active Directory administration

EDUCATION

Executive MBA, Business Management | Fundação Getulio Vargas (FGV) | Jan 2025 – May 2026 | Completed

Postgraduate Specialization, Software Architecture | Centro Universitário Facens | Feb 2023 – May 2025 | Completed | GPA 9.6/10

Associate Degree, Systems Analysis and Development | Universidade Paulista (UNIP) | Feb 2021 – Dec 2022

CERTIFICATIONS

Foundational C# with Microsoft | Microsoft / freeCodeCamp | Mar 2026 | Credential: paiineli-fcswm

English Semi Intensive Program – Advanced 2 | OHLA Schools, Miami, FL | Apr 2026

LANGUAGES

Portuguese: Native | **English:** Advanced (Professional Working Proficiency)
